

22 MM SYLVASPORT BEECH SOLID HARDWOOD FLOORING

STYLE CHART, B 2.1.1

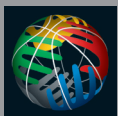

SPORT

Junckers floors - made for sports. A heavy solid hardwood board manufactured from two rows of staves with a thickness of 22 mm comprises the basis of any Junckers sports floor. The wood has been carefully selected and has undergone thorough quality control, thus ensuring that only the best wood is being used for sports floors.

Junckers solid hardwood flooring is produced and categorised according to Junckers factory standards and in accordance with prEN 13629. Junckers 22mm SylvaSport Beech flooring conforms to EN14904 when installed over one of our sports undercarriage systems. Junckers floors are made exclusively from solid hardwood, with all the characteristics typical of this natural material. Each style will display a unique range of grain and colour characteristics. The photographs are designed to show the average appearance of the style and species. It is normal to see a variance in appearance between individual boards and packs. Floors laid at differing times may vary slightly because of this average grading. In general, standing or lying annual rings, hairline splits and sapwood are allowed; Up to 5% of the boards may contain features of the next style option. Hardwood floors may fade and change colour over time due to exposure to natural sunlight.

Beech Strip Board

TECHNICAL INFORMATION | BEECH STRIP BOARD

Sylvasport Classic / SylvaSquash has a uniform look with some colour and structural graining variation between the staves. Small sound black knots. Few very fine hairline splits. Minor voids in wood. Ideal for dedicated high performance sporting use where visual clarity is important.

SylvaSport Premium / Sylvarobic Premium has a natural look with more colour and more structural graining variation between the staves. Sound medium sized black knots and knots on edges of boards. Hairline splits; individual and in groups, red heartwood and inbark. Minor voids in the surface of the wood. Knots and other features are factory filled with one colour filler. Ideal for all multi-purpose sports floor use.

SylvaSport Club has a rustic look with substantial colour and structural graining variation between the staves. Knots and open knot holes to any extent. More hairline splits; individual and in groups, red heartwood, pith and inbark. Voids in the surface of the wood. Knots and other features are factory filled as much as possible with one colour filler. Ideal for multi-purpose use which includes sporting activities.
